

Fire Door Stop Vertical System

*Top View

- ① The Crown Fire Door Stop Vertical System for Steel Doors
- ② Intumescent Smoke Seal

Option:

The Crown Latch Protector May Be Necessary for Proper Latch Penetration into Your Striker Plate

- UL listed for excessive clearances and gaps
- UL tested and listed to allow for excessive clearances up to 1/2" on steel doors
- UL fire-rated for up to 180 minutes
- Does not increase or decrease your fire door assembly's existing fire rating
- Tested under NFPA-252 with hose stream, ANSI/UL 10B with hose stream, UL 10C, CAN/ULC S104-10
- Use with the Crown Latch Protector if latch engagement is an issue
